اسم الطالب :	رقم الجلوس :	اللجنة :
---------------------------	---------------------------	-----------------------

"اللَّهُمَّ لَا سَهْلَ إِلَّا مَا جَعَلْتَهُ سَهْلًا، وَأَنْتَ تَجْعَلُ الْحَزْنَ إِذَا شِئْتَ سَهْلًا"

I. COMPOSITION (Practice Bank)

A) Guided Composition Prompt 1

Write a paragraph giving advice to a friend who wants to keep fit and stay healthy.

Use: (should / ought to / had better — junk food / nutritious food — exercise / work out — give up / take up — get enough sleep)

B) Guided Composition Prompt 2

Write a paragraph giving advice to a friend who wants to save money for a new car. Use: (should / had better —spend / save — part-time job — luxury items / essentials — open a bank account)

C) Free Composition 1

Write a paragraph about The Progresses Made in Saudi Arabia by 2030. Discuss changes in areas like healthcare, education, or culture.

D) Free Composition Prompt 2 (Practice Version)

Write a paragraph about your dream job in the future. Discuss what the job is, what skills you need, and why you want to do it.

II. READING COMPREHENSION (8 Marks)

Read the following text and answer the questions below:

From the Stone Age to the present, people have shown a desire to send messages over long distances. Ancient Greeks used mountain-top fires to relate news, while native people in the Americas used smoke signals. In modern times, people communicated by letter, telegraph, and telephone, but no method has become as widespread as quickly as email.

The first email message was sent in 1971 by Ray Tomlinson. He was testing the system using a nonsense message: "QWERTYUIOP." He used the @ sign to identify messages headed out of the local machine to the more distant ones. By the end of the 20th century, there were 263 million email boxes; today, that figure has grown to over 4 billion.

However, the way we share information continues to evolve. With the rise of smartphones and high-speed internet, social media platforms and instant messaging apps have changed our "digital footprint." We no longer wait days for a letter; instead, we receive notifications in milliseconds. This instant connectivity allows people to share photos, videos, and news across the globe immediately, making the world feel like a small village.

Looking toward the future, communication is becoming even more advanced with Artificial Intelligence (AI). New systems can now translate different languages in real-time during a conversation. While the methods change—from fire signals to fiber optics—the human goal remains the same: to stay connected, share knowledge, and bridge the gap between different cultures and places.

1. Which method did the Ancient Greeks use to share news?

- A) Smoke signals
- B) Writing letters
- C) Mountain-top fires
- D) Telegraphs

2. Who was the first person to send an email message?

- A) Ray Tomlinson
- B) Samuel Morse
- C) Alexander Graham Bell
- D) A group of Native Americans

3. What does the nonsense message "QWERTYUIOP" represent?

- A) A secret military password

- B) The name of the first email server
- C) The top row of a standard keyboard
- D) An ancient Greek greeting

4. The word "widespread" in the first paragraph is closest in meaning to:

- A) Very rare or uncommon
- B) Found over a large area or among many people
- C) Extremely fast and dangerous
- D) Difficult to understand or learn

5. Why did the inventor use the "@" symbol in the first email?

- A) To make the message look professional
- B) To separate the user from the distant machine
- C) Because it was the only symbol on the keyboard
- D) To hide the identity of the sender

6. What has changed our "digital footprint" in recent years?

- A) Mountain-top fires
- B) Paper letters and stamps
- C) Smartphones and social media
- D) The use of the Stone Age tools

7. How will Artificial Intelligence (AI) assist communication in the future?

- A) By sending messages slower
- B) By translating languages in real-time
- C) By replacing the need for the internet
- D) By bringing back smoke signals

8. What is the main idea of the entire passage?

- A) Email is the only way to communicate.

- B) Modern technology is too difficult to use.
- C) Communication methods change, but the need to connect remains.
- D) Ancient communication was faster than modern apps.

II. READING COMPREHENSION 2 (8 Marks)

Read the following text and answer the questions below:

In the 21st century, the concept of "Green Cities" has become a global priority. As urban

populations grow rapidly, architects and engineers are designing modern buildings that use solar power and recycled water. Cities like Curitiba in Brazil and Masdar in the UAE are leading the way by creating sustainable public transport systems. These innovative designs aim to reduce carbon emissions and protect the environment for future generations.

Technology plays a massive role in this urban transformation. Smart sensors are now used to control street lighting and manage waste more efficiently. Furthermore, urban farming has become popular, where residents grow vegetables on rooftops to provide fresh food for the local community. This trend not only cleans the air but also improves the mental health of city residents by providing more green spaces in crowded areas.

However, the transition to green living is not without challenges. Transforming older cities requires a lot of money and changes to existing infrastructure. Many leaders argue that while the cost is high, the "digital footprint" of traditional cities is too damaging to ignore. Therefore, governments are offering incentives for businesses to switch to renewable energy, making it easier for everyone to participate in protecting the planet.

Looking toward the future, the development of "Mega Projects" like NEOM in Saudi Arabia promises to redefine how we live. These cities will be powered entirely by renewable energy and will feature zero-car zones. The focus is shifting from simple efficiency to a deep harmony between nature and technology. The ultimate goal is to create a world where humans can thrive and stay connected without destroying the natural resources of the Earth.

1. What is a main priority for architects in modern Green Cities?

- A) Building more roads for heavy traffic
- B) Designing buildings that use solar power
- C) Moving all residents to the countryside
- D) Using the oldest construction methods

2. Which city is mentioned as a leader in sustainable transport in the UAE?

- A) Curitiba
- B) NEOM

- C) Masdar City
- D) Jeddah

3. How do smart sensors help make a city more efficient?

- A) By growing food on rooftops
- B) By controlling street lighting and waste
- C) By building faster airplanes
- D) By increasing the use of carbon

4. The word "sustainable" in the first paragraph is closest in meaning to:

- A) Very expensive and rare
- B) Able to continue for a long time
- C) Old-fashioned and slow
- D) Noisy and crowded

5. Urban farming involves growing food in which location?

- A) Inside large shipping factories
- B) On city rooftops
- C) In the middle of the deep ocean
- D) Under the city streets

6. What is a challenge for older cities mentioned in the third paragraph?

- A) They have too much renewable energy.
- B) They require high costs and infrastructure changes.
- C) They do not have enough residents.
- D) They are already too green to change.

7. What is a unique feature of the NEOM project in Saudi Arabia?

- A) It will have the most cars in the world.
- B) It will be powered by renewable energy.
- C) it will only use fire signals for news.
- D) It will have no green spaces or plants.

8. What is the main idea of the entire passage?

- A) Technology and nature should be kept separate.
- B) Future cities must balance modern living with nature.
- C) Living in a city will be impossible in the future.
- D) Traditional cities are the best way to live.

III. VOCABULARY (8 Marks)

1. Fill in the blanks with the correct words from the box: (3 Marks - ½ mark each)

philanthropist | warranty | anorexia | self-esteem | fragile | ATM

1. Teenagers often suffer from low _____ because of peer pressure.
2. I need to go to the _____ to withdraw some cash.
3. The computer crashed, but luckily I have a three-year _____.
4. _____ is an eating disorder that often affects appetites.
5. Shaikh Sulaiman Al-Rajhi is a leading _____ who helps others.
6. Be careful with the glass; it is _____ and can break easily.

2. Match each word/expression with its meaning: (3 Marks - ½ mark each)

1. Beats me!	()	To disappoint someone.
2. No way!	()	A good time.
3. Let someone down	()	I have no idea.
4. Have a ball	()	I won't allow that.
5. Feeling down	()	Honest and frank.
6. Be straight	()	Feeling depressed.

3. Match each word with its opposite: (2 Marks - 1 mark each)

1. Urban	()	Flimsy / Weak
2. Reliable	()	Rural

III. VOCABULARY (8 Marks)

1. Fill in the blanks with the correct words from the box: (1 Mark each)

philanthropist | warranty | anorexia | self-esteem | fragile | ATM | nuisance | vandalism

1. Teenagers often suffer from low _____
2. I need to go to the _____ to get cash.
3. The computer crashed, but I have a _____
4. _____ is an eating disorder.
5. Al-Rajhi is a leading _____
6. Be careful; the glass is _____.
7. Graffiti on walls is _____.
8. Construction noise is a _____.

2. Match each word/expression with its meaning: (1 Mark each)

1. Beats me!	()	To disappoint someone.
2. No way!	()	A good time.
3. Let someone down	()	I have no idea.
4. Have a ball	()	I won't allow that.
5. Feeling down	()	Honest and frank.
6. Be straight	()	Feeling depressed.
7. In style		Fictional story
8. Plot		Fashionable

IV. GRAMMAR (8 Marks)

1. Choose the correct answer: (2 Marks - ½ mark each)

1. If I _____ a million dollars, I would travel the world.
a) win b) won c) winning
2. I'm looking forward to _____ you in person.
a) meet b) meets c) meeting
3. Have you finished your homework _____?
a) yet b) already c) just
4. The car _____ to be washed; it is very dirty.
a) need b) needs c) needing
5. If you heat water, it _____
a) boil b) boils c) boiling
6. I'll call as soon as I _____
a) arriving b) arrived c) arrive

2. Match each form with its correct example: (2 Marks - ½ mark each)

1. Present Perfect	()	I wish I were rich.
2. Used to (Past Habit)	()	She has already left.
3. Imaginary Conditional	()	If I were you, I'd study.
4. Wish Statement	()	People used to send smoke signals.

3. Rewrite to use "have/get something done": (2 Marks - 1 mark each)

1. The mechanic fixed my car.

I _____.

2. Someone repainted the filthy walls.

We _____.

4. Rewrite using an object pronoun: (2 Marks - 1 mark each)

1. Put away your shoes.

Put _____ away.

2. Turn off the computer.

Turn _____ off.
