

Grade 12 – SOLVED Worksheet

Kingdom of Saudi Arabia

Ministry of Education

Academic Year 2025–2026

Subject: English

Grade: 11

 **TEACHER COPY — SOLVED VERSION (DO NOT DISTRIBUTE)**

Total Marks: 40

Time: 90 minutes

SECTION A — Reading Comprehension (8 marks)

Technology and Teenagers

Technology plays an important role in the lives of many teenagers today. Students use smartphones, tablets, and computers for communication, learning, and entertainment. While technology makes it easier to access information and stay connected, it can also create problems such as distraction, stress, and lack of physical activity.

Many teachers believe that technology should be used carefully in education. When students rely too much on devices, they may lose important skills such as critical thinking and face-to-face communication. However, when technology is used in a balanced way, it can support learning and help students prepare for future careers in science, business, and technology.

Teenagers need guidance to use technology responsibly. Schools and parents should work together to teach students how to manage their time online and make smart choices. With the right balance, technology can be a powerful tool rather than a problem.

A1. Multiple Choice & Short Answer

1. Name one device mentioned in the text: [smartphones / tablets / computers]
2. What problem can technology cause for students? [distraction / stress / lack of physical activity]
3. In paragraph 2, the word "they" refers to: [students]
4. Why is balance important when using technology? [It supports learning without causing problems]

A2. True or False

- [F] Technology is only used for entertainment.
- [T] Too much technology can cause stress.
- [F] Teachers believe technology should never be used.
- [T] Parents and schools should guide students.

SECTION B – Grammar (8 marks)

1. While I [was studying], my phone rang.
2. She [has worked] here for two years.
3. I think he [will] become an engineer.
4. They [are going to] visit the university next week.
5. New solutions to pollution [have been discovered] by scientists.
6. The lesson [was explained] clearly.

SECTION C – Vocabulary (8 marks)

1. Scientists use a [microscope] to see very small objects.
2. Air [pollution] is a serious global problem.
3. Students need [motivation] to succeed in school.
4. [Honesty] helps people trust each other.
5. Modern [technology] has changed communication.

Global Issues: [pollution]

Personal Qualities: [honesty]

Scientific Tools: [microscope]

SECTION D – Writing: Guided Composition (8 marks)

Sample answer:

My dream job is to become a software engineer because I enjoy solving problems and working with technology. To do this job well, I must learn how to code and understand computer systems. I should study subjects like computer science and mathematics at school and university so I can gain the right qualifications. This job is important because technology helps improve people's lives and create new solutions for everyday problems.

SECTION E — Writing: Free Composition (8 marks)

Sample answer:

Technology makes life easier for young people because it helps them learn, communicate, and save time. However, students should be careful not to use devices too much. Too much screen time can cause stress and reduce physical activity, so young people must find a balance between technology and real life.
