 SECONDARY STAGE – EXAM WORKSHEET

Total Marks: 40

Time: 90 minut

SECTION A — Reading Comprehension

(8 marks)

Read the text and answer the questions.

My Dream Job

1. Many teenagers think seriously about the job they would like to do in the future. Some students want to become doctors, engineers, or teachers, while others prefer creative careers such as writing, design, or technology. Choosing a dream job is not always easy, and it often changes as students grow older and learn more about themselves.
2. To achieve a dream job, students need to work hard at school and develop strong study habits. They should choose subjects that match their interests and future plans. For example, a student who wants to work in science must study subjects like biology and chemistry, while someone interested in technology should focus on computer science and mathematics. Going to university or college is also important for many careers, because **it** helps students gain the qualifications they need.
3. In addition to education, personal qualities play an important role in success. Motivation helps students continue working even when things are difficult. Honesty and integrity are important qualities in any job, and flexibility helps people adapt to new situations. With the right qualifications, skills, and personal qualities, students can turn their dreams into real careers in the future.

A1. Multiple Choice & Short Answer (4 marks)

1. Name two jobs mentioned in the text:

2. Which personal quality helps students continue when things are difficult?

3. In paragraph 2, the underlined word “it” refers to:

- a) Science
- b) Technology
- c) University or college
- d) A dream job

4. Why is choosing a dream job sometimes difficult?

- a) Because subjects are too hard.
- b) Because students change as they grow older.
- c) Because there are no jobs available.

A2. True or False (4 marks)

Write **(T)** for True or **(F)** for False.

- [] Students should choose subjects that match their interests.
- [] Chemistry is a recommended subject for someone interested in technology.
- [] Flexibility is only important for people who work in science.
- [] Success depends on a mix of education, skills, and personal qualities.
